The International Conference on Microelectronics (ICM) has been held in numerous countries across the Middle East and Asia over the past 29 years. The 30th edition of the conference will be held in Tunisia.

ICM 2018 will include oral, poster sessions and tutorials given by experts in state-of-the-art topics. The regular technical program will run for three days. In addition, tutorial sessions will be held on the first day of the conference. Papers are solicited in, but not limited to, the following topics:

Circuits and Systems	CAD Tools and Design	Micro/Nanoelectronics
1. Analog and RF circuit design techniques	1. Simulation (process, device, circuit, logic, timing, functional)	1. Device characterization and modelling
2. Digital signal and data processing	2. Layout (plac., rout., floor plan., symbolic, ERC, DRC)	2. Device physics and novel structures
3. Wireless com. systems	3. Silicon optimization	3. Process technology, CMOS, BJT,
4. Nonlinear circuits	4. Parallel embedded systems	4. BiCMOS, GaAs
